// console.log(daniel['interests']);

Other Interests

- I love to write about various topics ranging from personal development to trending topics in sports.
- I love chess. It has always been a great way for me to pass time, whilst flexing my brain muscles and having fun.
- I love music. For me it's not just a song - it's a beautiful construction of notes. Intricate elements eloquently crafted to give us goosebumps

// console.log(daniel['skills']);

Skillset

>> Python

- This is my primary language. I've used python for several years, always yearning to see how I can use this diverse language to learn more and solve problems.
- I use Python mainly for Data Analysis with Pandas, Numpy and experiment with ML algorithms from TensorFlow.
- I also work well with the Django framework.

>> JavaScript

- Extremely Familiar with JavaScript
- Great knowledge of Modern Frameworks like React, Ionic etc.

>> Miscellaneous

scikit-learn, Dash, matplotlib, SQL, HTML, CSS, Git, Docker, TailwindCSS, Node.js, Heroku, Selenium Automation, Pygame, Figma.

// console.log(daniel['work']);

Work Experience

>> Lead Developer

Learnr.org | March, 2020 to present

In charge of the production of the Learnr website. Analyzed backend architecture and supervised the frontend designs.

>> Junior Data Analyst

3DM | June, 2019 to July, 2019

Briefly implemented techniques to improve collection and processing of data. My task involved data cleaning and mining. Created automation software to draw data to a source before cleaning and sending to the database

>> Tech Consultant

The Childville Senior | December, 2018 to May, 2019

Frequently analyzed the school website whilst offering critique and recommendation on the web architecture.

>> Tech Advisor

Paladium Group | November, 2018 to May, 2019

Was a part of the development team for the NOMIS Mobile application. NOMIS was an application designed to easily collect data on individuals in the community with ease. Tested software and brainstormed ways to improve user experience.

// console.log(daniel['education']);
